

NEMT Technology Recommendations for Porch Light Foundation

Fleet Technology Infrastructure

1. GPS Fleet Management & Tracking

- **Vendors:** Verizon Connect, Samsara, Geotab
- **Essential Features:**
 - Real-time vehicle tracking with 30-second update intervals
 - Route optimization to improve efficiency and reduce costs
 - Driver behavior analytics (speed, harsh braking, etc.)
 - Geofencing and automated alerts for route deviations
 - Maintenance scheduling and vehicle health monitoring
- **Typical Costs:**
 - Hardware: \$300–\$500 per vehicle (one-time)
 - Subscription: \$20–\$65 per vehicle/month

2. Dash Cameras & Interior Surveillance

- **Vendors:** SmartWitness, Safety Vision, Pro-Vision, BrickHouse Security
- **System Components:**
 - Forward-facing dash cam (incident documentation)
 - Interior-facing camera (passenger/driver safety)
 - Driver-facing camera (for training and compliance)
 - Optional: Rear camera for backup and loading visibility
- **Key Features:**
 - HD video, night vision, and wide-angle lenses
 - Cloud-based video upload and storage (30–90 days)
 - Event-triggered recording (hard stops, accidents)
 - Two-way audio (optional; for communication and safety)
- **Typical Costs:**
 - Equipment: \$400–\$2,000 per vehicle (depends on configuration and number of cameras)

- Cloud storage: \$25–\$50 per vehicle/month

3. NEMT Management & Dispatch Software

- **Platforms:** RouteGenie, TripSpark, NEMT Cloud Dispatch
- **Essential Capabilities:**
 - Automated trip scheduling, dispatch, and route assignment
 - Patient/ride tracking and communication tools (SMS notifications, ETA)
 - HIPAA-compliant medical record integration
 - Electronic billing compatibility (Alabama Medicaid/Medicare, EBT trip logs)
 - Performance analytics and reporting dashboard
- **Costs:** \$50–\$300 per vehicle/month (varies by features and fleet size)

4. Driver & Passenger Safety Tech

- **Features to Consider:**
 - Onboard emergency alert buttons (silent alarms for incidents)
 - Vehicle immobilization (remote disable in emergencies)
 - Hands-free, Bluetooth-enabled communication
- **Compliance:** Ensure all video/audio equipment meets Alabama privacy laws (passenger signage, consent provisions)^[1].

5. Integrated Technology Platform

- Unify GPS, camera, and dispatch software through a single dashboard. This improves compliance, reduces data silos, and makes training/staff oversight more efficient.

Recommended Vehicle Types (Brief Note)

- **Ford Transit 350 WAV (Side Entry):** Best for reliability, capacity, and ADA compliance.
- **Toyota Sienna Hybrid WAV:** Ideal for fuel savings and high-mileage routes.
- **Used, quality-certified ADA minivans:** Budget option for fleet expansion.

All vehicles should have:

- Minimum 56-inch door height, 30-inch wide ramp/lift, anti-slip floors, securement systems for wheelchairs, and robust HVAC for client comfort^[1].

Summary Table: Technology and Budget Overview

Technology	One-Time Cost (per vehicle)	Monthly Cost (per vehicle)
GPS Tracking	\$300–\$500	\$20–\$65
Dash/Interior Camera System	\$400–\$2,000	\$25–\$50 (cloud storage)

Technology	One-Time Cost (per vehicle)	Monthly Cost (per vehicle)
Dispatch/NEMT Software	N/A	\$50–\$300
Emergency Safety Tech	\$100–\$300	N/A
Professional Installation	\$200–\$500	N/A

Key Implementation Tips

- Prioritize camera and GPS installation on all vehicles at launch for safety/legal compliance and insurance discounts.
- Choose software vetted for NEMT fleets operating in Alabama's Medicaid environment.
- Consider bundled vendor contracts to reduce installation and training costs.
- Develop written policies for data privacy, camera usage, and tech support to meet regulatory requirements.

These technology recommendations will provide a robust foundation for operational excellence and risk mitigation as you launch the Porch Light Foundation's NEMT services^[1].
